Continuation of 11. does NOT place the application in condition for allowance because: It is noted that a petition regarding the restriction requirement was filed on 10/3/06 and is pending a decision. Therefore, applicant has not cancelled the non-elected subject matter of the pending claims.

Applicant's arguments do not overcome the pending rejection of claim 1 under 35 U.S.C. 112, first paragraph. As explained in the office actions mailed on 4/14/06 and 9/18/06, one of ordinary skill in the art would not recognize that applicant was in possession of such a large scope of therapeutic agents, as instantly recited. Upon further consideration, the description regarding antisense oligonucleotides and RNAi inhibitors is sufficient to describe oligonucleotides, as recited in claim 14.

With regards to claim 1, applicant argues that applicants have no control over inhibitors that have not yet been described in the art. However, the test for written description is possession and applicant clearly is not in possession of any therapeutic agent that is effective to reduce the amount of clusterin in melanoma cells by disclosing antisense oligonucleotides and RNAi inhibitors. The claim embraces a multitude of inhibitors such as small molecule inhibitors, antibodies, miRNAs, ribozymes, aptamers, as well as any other inhibitory agent. It is noted that it is improper for applicant to argue an unpublished board decision and such arguments have not been considered. Applicant argues In re Fuetterer, which was responded to by the examiner in the office action mailed on 9/18/06. The examiner is not requiring for applicant to discover which possible therapeutic agents will function properly in the method, but rather is requiring a description of an adequate number of species of therapeutic agents to be used by the method that is commensurate with the scope of the instant claim so that one of ordinary skill in the art would recognize that applicant was in possession of the claimed invention. Claims 2-10 and 14 would be allowable if the non-elected subject matter of claims 3, 6, and 9 was cancelled. Additionally, it is noted that if the non-elected subject matter were cancelled, claims 6 and 7, as well as claims 9 and 10, would be substantial duplicates.
